13 Mar 74

Addition to chronology on tape of 20 Jun 72, if you want to bother with it:

Sims testified 17 Jan 74 that Bull asked for modification of the Uher recorder 9 Nov 73, and the Secret Service modified the machine 12 Nov.
WXP 18 Jan 74, Lardner

STM(W)'s 3/13/74 add 6/20/72 chron, Bull asked modification Uher 11/9/73: does STM(W)'s chron or pure STM retrieve any special or significant event circa 11/9/73? Seems to me to be in time to invalidate any scientific testing machine and perhaps farout plot to say this one could not have erased. Thanks HW 3/18/
